

The truth of the calendar of G-d

Remember the former things of old: for I am God, and there is none else; I am God, and there is none like me, declaring the end from the beginning, and from ancient times the things that are not yet done, saying, My counsel shall stand, and I will do all my pleasure (Isaiah 46,9-10)

Problem of the times

The problem is and I find the times of days, months and years are very confusing in different calendars. See Calendar Wikipedia.
Which times are from G-d? In which New Year is the first day of the month? In the Jewish calendar, the New Year is in the seventh month Tishrei (September/October), the Gregorian Calendar the New Year in January and the Biblical Calendar the New Year in the first month Nissan (March/April). Noah lived after the flood on the first day of the first month of the 601th year. According to the Jewish calendar would be the 602th year. According to the Gregorian calendar, the first month of January would be in the 600th year. The error-deviation could be 2 years. All times are in the hands G-d's, Your time is not My time. We need to listen better to the times G-d's and add all the times from the creation of the world. Thus, the problem of the times is better solved, see "The Jewish Time Calculation from the Creation of the World" according to the G-d's calendar.

The time of

The first day in the first month Nissan (March/April)

G-d: And God called the light Day, and the darkness He called Night. And there was evening and there was morning, one day (Genesis 1:5). Also, **the first day in the first month is Nissan** from the creation of the world!

Adam: **On the first day of the month Nissan** began the sin of man. And Adam knew Eve as his wife, and she became pregnant and bore Cain ([Genesis 4:1](#)).

Noah: In the year 601 [of Noah's life], on the first day of the first month, the waters were drying up from the land... ([Genesis 8:13](#)). In the New Year Noah after the Flood was **the first day in the first month Nissan**.

Jeshua: Jeshua was born **on the first day in the first month of Nissan** (March/April), because John was six months older than him, from the sixth month of Elizabeth's pregnancy to birth, see page 23 ([Luke 1:26-38](#)).

the Almighty: I am the Alpha and the Omega, the Beginning and the End, says the Lord God, He Who is and Who was and Who is to come, the Almighty (the Ruler of all) ([Revelation 8:1](#)). This is **the first day of the month Nissan** and also the end of time.

My decision of the time calculation from the creation of the world

I decided to recalculate the times of G-d's from the creation of the world to get a better overview. I do not want to write and betray everything here. It is better to research and discover the times of G-d. Everything is failed if the times are not of G-d.
Excuse me, my mistake of the time calculation also happens, so I ask for correction! Do you have criteria?

Samuel	40	515	2966	-1016	1 Samuel 7:15	Acts 13:21	Beginning of the king's time

The period after the take-over (Book of Joshua) is described until shortly before the beginning of the king's time under Saul (ca. 1050 B.C.).

It is recorded in [Book of Judges](#). In the first judge year of Eli, Samuel was admitted in his first year. When Eli died in the 97th year,

Samuel would be 57 years old, he directed forty years in Israel how King Saul reigned 40 years, proves in [Acts 13:20-21](#).

A total of 475 years, Joshua directed 25 years and the judges' time (from Othniel to Eli) lasted about 450 years, Total would be 515 years

of the the judges' time. But the judges' time ended under Eli, when the king's time began. The Judges' time of Samuel ceased,

When Samuel died at his age of about 97 years, King Saul died at the same time in the war. But 480 years after the Exodus began

the king's time of Israel -1056. The king's time of David flourished, when Samuel's judgment ended.

It happened in the four hundred and eightieth year after the Exodus, that is, in [1 Kings 6:1](#).

This is the third proof that the Jewish time calculation after taking the land Joshua's from the Judges' time until shortly before the beginning of the king's time agrees well. **It also proves that the king's time -1056 - -586 (until the end of Judah) lasted 470 years.**

Talmud reckons from the creation of the world to after Exodus Egypt **2448 years**.

The current calculation is **2451 years**. **The difference is only + 3 years!**

Thus **the further proof** is that the Jewish time calculation according to Talmud from Adam to Exodus Egypt is astonishingly identical with the current calculation.

Frankly, the calculation from Exodus Egypt to 2. Destruction Temple is not clear how Talmud calculates.

From where comes the number of 1000 years between 312 BC. and 2448 from Exodus Egypt?

The deviation means: Birth of Jesu 4 BC. And 1 year plus to Talmud count together 5.

The current calculation shows the **difference of -222 years**.

222 years are missing from the current calculation in the Jewish calendar of 3761 years B.C. from the creation of the world.

Who knows more about it?

Noah was not alone, his father Lamech and his grandfather Methuselah lived still before the flood. Lamech died five years before the flood.

Methuselah died during the Flood in 2326 B.C. It is possible, over 1000 relatives of Noah helped build the ark. Noah directed them.

Noah begat three sons before the flood, Shem, Ham, and Japheth, for the next generation. Only the relatives died before the flood.

As the priests, like Zacharias, served according to the order of the feasts in the temple of Jerusalem, [the birth date Jesu](#) is doubtful, since the calculation is not compatible to the order of the feasts. Zacharias was neither at the Succoth nor at the feast of the Passover when the angel spoke to him, as in Luke. Zacharias served as usual in the temple around the clock. There appeared an angel of the Lord to him, who stood at the right of the incense altar. And Zachariah was frightened when he saw him, and fear fell upon him, ([Luke 1: 11-12](#)). According to the order of the G-d's calendar-see page 1, G-d is the beginning and the end, it is considered why Jeshua was born on **the first day in the first month Nissan** because John was six months older than Jeshua. G-d teach us, Your Time is not my Time. Here is the Time calculation of John and Jeshua's birth not according to the order of priests.

	John			Luke 1:5-25: The announcement of the birth John of the Baptist
	1 month			But the angel said to him, Do not be afraid, Zachariah, because your petition was heard, and your wife Elizabeth will bear you a son, and you must call his name John
	Elisabeth			[God is favorable]. Luke 1:13
	hid herself			Elisabeth was pregnant in the 10th month Tevet Luke 1:24
	5 months.			and hid five months.
	6th month	Jeshua	Mary	Luke 1:26-38: The announcement of the birth Jeshua
		1 month	about	Now in the sixth month [after that], the angel Gabriel was sent from God to a town of Galilee named Nazareth,... Luke 1:26
			3 months	
			in Jerusalem	Luke 1:39-45: The visit of Mary to Elizabeth in Jerusalem
	9th month		with Elisabeth	Now the time *) that Elizabeth should be delivered came, and she gave birth to a son.
	01/07/3977	Succoth	about	*) In the seventh month before Sukkot, about the beginning of Tishrei 3977. Luke 1:57
			6 months	And Mary remained for about three months and then returned to her home. Luke 1:56
			in	After Sukkot she went home to Nazareth and stayed for 6 months in Nazareth.
			Nazareth	
		9th month		
		01/01/3978	Bethlehem	Luke 2:1-7: The Birth Jeshua in Bethlehem
				Mary stayed about three months to the end Sukkot, as Elisabeth was in the 6th month pregnant. Elizabeth bore John at the beginning of the seventh month Tishrei. Mary was already in the fourth month and returned to Nazareth. It took another five months, just at the beginning of the new year Nissan 3978 , Mary bore Jeshua in Bethlehem, so prophetic,

		Adar II. 14.13.79	21/03/2019	March	Day 5, Thursday	07:12:00	

Why is a problem of the deviation of months and days?

- **Jewish calendar** has the deviation between Adar I and Adar II. 5779 (19.02.2019 and 21.03.2019).
- **The Gregorian calendar** has the deviation of February 2018, since the full moon is missing in February 2018, but two full moons in **January I and II** (2. January 2018 and 31. January 2018) and **March I and II** (02.03.2018 and 31.03.2018)

Astrology has failed!**Chronology - Astronomical era**

In the g-d's calendar the deviation is 0, each full moon is always a month, 30 - / + days and in 360 - / + days, as in the Bible about the creation of 7 days (week) and the determination of times and days and years.

Astrology, on the other hand, counts 364 days a year for the moon and the sun. The only thing that mitigates this supposed - but for every subject - practicable - "confused" is the passing weekdays. Therefore, for centuries, all attempts to reduce the year to exactly 52 weeks (364 days with 1-2 "weekless" closing days), or even a 10-day week, were doomed to failure, according to the astronomical chronology.

Why are Adar I and II distributed in 13 months in 5779? And why is the full moon missing in February 2018? It will be too long to substantiate in details. 364 days per year? $4 \text{ days} \times 24 \text{ hours} \times 60 \text{ minutes} / 360 \text{ days} = 16 \text{ minutes} / \text{day}$ Time shift! Where does the deviation from 16 minutes / day come from? I believe the time shift is not from G-d, but from astrology. Both the Jewish calendar and the Gregorian calendar show the time shift according to the Mondcalendar, so it is denied. I'm right? All biblical times lie in the hand of G-d alone. He can slow down or speed up time, but He does not, because time is the order of G-d. The times after the moon and sun have to be adjusted again and again, according to the astronomical chronology. The time of the moon and the sun is reglamated, our time is not your time. I believe the Astrology has failed, but the astronomical chronology helps to adjust the times according to the G-d's moon calendar. We can calculate the noah time and the Jesu' birth time according to the God's moon calendar, why astrology failed.

Determination of times and days and years

And God said, Let there be lights in the expanse of the heavens to separate the day from the night, and let them be signs and tokens [of God's provident care], and [to mark] seasons, days, and years, so in [Genesis 1:14](#).

In the Bible, there are no seconds and minutes to read. But we find good hours and months, but where do the 24 hours a day come from? I do not know how the hours and minutes are divided into one day. Where does the time of seconds come from? I guess there is a problem of time shifting. The G-d's calendar is more accurate by the determination of times, days, and years! All times are alone in the hands of G-d!
